SIFAT HASAN

Frontend Developer

+880 1827332136 • sifatshasan@gmail.com • LinkedIn | Portfolio | GitHub • Sirajgonj, Bangladesh

Summary

Experienced Frontend Developer with a strong focus on React.js, Next.js, and building scalable web applications. Proficient in developing custom APIs, configuring NextAuth for secure authentication, and integrating popular UI component libraries such as ShadCN, Magic UI, and Assertivity UI. Skilled in using GitHub for version control and managing tasks with Jira. Recognized for delivering responsive, high-performance user interfaces, optimizing frontend performance, and solving complex problems. Adept at collaborating with teams to build production-ready applications.

Skills

Backend: Node.js · Express.js · REST API Development · Next.js API Routes · MongoDB · Nextauth Authentication · Mongoose · Your Skill

Tools & Workflow: Git · GitHub · VS Code · TanStack Query · NextAuth · Jira · Firebase Hosting · Postman · Jod · Your Skill

Soft Skills: Problem-Solving · Teamwork · Adaptability · Continuous Learning · Communication

Projects

Life Insurance Management System

LiveLink:https://life-insurance-management.web.app Gitlink:https://github.com/sifathasan2430/-Life-Insurance-Management-Platform   01/2023 - 01/1970

Role-based MERN Stack Application for managing life insurance policies

- Developed reusable, production-ready UI components using Tailwind CSS and a custom design system, ensuring consistent application-wide UI
- Engineered role-based dashboards for Admin, Agent, and Customer, streamlining policy management, agent assignment, and policy purchasing workflows
- Enhanced user experience by implementing debounced search functionality and robust race condition handling with TanStack Query

Roommate Finder

LiveLink:https://roomatefinder-5e9a6.web.app/ Gitlink:https://github.com/sifathasan2430/roommatefinder-client-site   01/2022 - 01/1970

Room booking system for managing room rentals and bookings

- Built a comprehensive room booking system enabling renters to advertise and manage bookings efficiently
- Integrated advanced search and filtering with optimized debounced input
- Ensured secure authentication and seamless onboarding using Firebase
